

**Cullinan Ranch Field Workshop**  
**August 18, 2015**  
**9:30am - 3:00pm**  
**Sonoma Baylands Center**

**Workshop objectives**

1. Participants increase their understanding about tidal marsh restoration practices at Cullinan Ranch
2. Participants increase their understanding about:
  - a. How tidal wetland restoration projects could be affected by sea-level rise,
  - b. Regulatory processes for permitting wetland restoration projects,
  - c. Best practices for tidal marsh restoration,
  - d. Managing sediment through local beneficial reuse at restoration sites including creating upland transition zones

**Workshop Agenda**

|                |  |
